Subject: Microsoft Settlement

I've watched Microsoft grow to it's position of supreme dominance in the PC operating system and software over the last 20 years. I have watched Microsoft destroy many innovative companies and products through means that I consider unfair and unethical. I believe that Judge Jackson's findings of fact and his remedy are unprejudiced and warranted. Microsoft 'is' a monopoly and must be disassembled. There needs to be fair competition, and Microsoft should not be allowed to continue as it has. Microsoft's proposed settlement of donating software does nothing to remedy it's wrongs. I believe that settlement is a very bad idea.
